

Name: Dr. Anita
Designation: Assistant Professor
Department: Geography
Faculty of Arts Craft and Social Sciences
Email ID: yogesh.sihag298@gmail.com

About: Dr. Anita is a dedicated researcher and academic in the field of Geography, specializing in agricultural development and environmental studies. She holds a Ph.D. in Geography from Tantia University, Sri Ganganagar, Rajasthan, along with an M.A. and B.A. in Geography from Maharaja Ganga Singh University, Bikaner. Her expertise spans regional development, environmental sustainability, and land-use planning, with a focus on how geography influences agricultural productivity.

Her research work, titled "Level of Agricultural Development and Environment: A Case Study of Sri Ganganagar Tehsil in Rajasthan" explores the intricate relationship between agricultural progress and environmental challenges. With four research publications and active participation in ten conferences/seminars, Dr. Anita has contributed significantly to geographic research and policy discussions.

Experience: 10 Years

Qualification:

- P.hD Geography, Tantia University, Sri Ganganagar, Rajasthan
- M.A. Geography, Maharaja Ganga Singh University, Bikaner
- B.A. Geography, Maharaja Ganga Singh University, Bikaner

No. of Research Publications: 04

No. of Conference/Seminar: 10

Research Work: - Level of Agricultural Development and Environment: A Case study of Sri Ganganagar Tehsil in Rajasthan.

Areas of Interests:

1. Agricultural Land Use Patterns– Examining the impact of changing land use on agricultural Production.
2. Environmental Sustainability in Agriculture – Studying soil health, water conservation, and eco-Friendly farming practices.
3. Socio-Economic Impact of Agricultural Development– Analyzing how agricultural progress Influences rural livelihoods and economic growth.
4. Climate Change and Regional Agriculture – Investigating how climatic variations affect crop Patterns and resource management.
